

¿De qué va a ir todo esto?

Alberto Labarga – Experimental Serendipity S.L.

Laboratorio de Fabricación Digital, Mutilva, 7 de Febrero de 2014

ARDUINO IS AN OPEN-SOURCE ELECTRONICS
PROTOTYPING PLATFORM BASED ON FLEXIBLE,
EASY-TO-USE HARDWARE AND SOFTWARE. IT'S
INTENDED FOR ARTISTS, DESIGNERS, HOBBYISTS
AND ANYONE INTERESTED IN CREATING
INTERACTIVE OBJECTS OR ENVIRONMENTS.

MakerBot Thingiverse
#backtoschool
Challenge
Most Useful

Thingiverse Featured

Most Useful was based on the application of the design. The Back to Basics Drafting Set won for its intense focus on utility. The pencil case has two 30-60-90 triangles for drawing lines and angles, as well as tracing several radii. The two pencil toppers snap together to create a compass. Finally, the ruler has four scales: "a 1:10 and 1:50 engineering scale, and a 1:100 and 1:500 metric scale."

Memories of an Arduino

How to get the most from your Arduino Memory

As your Arduino projects get more sophisticated, they tend to grow to the point where memory limitations can become a problem. This guide explains the different types of Arduino memory and how to use them most effectively.

Lesson 0. Getting Started

Learn Arduino, Lesson 0. Getting Started

Adafruit Proto Shield for Arduino

Arduino Prototyping

This is a design for an open-source prototyping shield for Arduino NG/Diecimila. It has tons of cool features, to make prototyping on your Arduino easy.

Arduino Lesson 17. Email Sending Movement Detector

Use an Arduino to send an email, whenever movement is detected with a PIR sensor.

Adafruit Arduino Selection Guide

Which Arduino is Right for Me?

This guide explains the differences between the various types of Arduinos and Arduino compatible microcontrollers and helps you to select the one that best fits your needs.

All About Arduino Libraries

How to install and use Arduino Libraries

Light Painting with Raspberry Pi

Awesome photographic effects!

Light painting — a technique mixing photography with electronics — becomes astoundingly simple when Raspberry Pi is involved.

DeLorean Time Circuit

Great Scott!

Make: Projects

Explore our growing cookbook of DIY projects for the workshop, [kitchen](#), garage, and backyard. Learn new skills, find [family fun](#), build a [robot](#) or a [rocket](#). [Get started in electronics](#) and use new platforms like [Raspberry Pi](#) and [Arduino](#) to power your inventions. Get inspired and start making something today.

Welcome to the new Make: Projects! User accounts are temporarily disabled. If you contributed on our old platform, you can still view your projects here, and we're working on an easy way to edit them in the future. If you'd like access to update a project, email us at projects@makezine.com.

Not find what you are looking for? Try searching for the project here:

DANGER

**PROTOTYPING
IN PROGRESS**

Our goal is to release a new open hardware project every month. This is a list of our projects that are currently in production. You can also see [in development projects](#), and [stuff we never got around to finishing](#). All the files and documentation are open source, feel free to reuse and share them. If you'd like to build a project yourself, [free PCBs](#) might be available.

This documentation is a wiki for anyone to edit. Please don't be shy, make corrections and contributions when you like.
